

DHRITHI K

Bengaluru, Karnataka

☎ +91 8660327346 ✉ dhrithik2004@gmail.com 🔗 linkedin.com/in/dhrithi-k 🌐 github.com/DHRITHI-K

Education

Indian Institute of Information Technology, Dharwad

B.Tech in Data Science and Artificial Intelligence

Graduated: 2026

Karnataka, India

Relevant Coursework

- Data Structures
- Machine Learning
- Natural Language Processing
- Database Management Systems
- Deep Learning
- Generative AI
- Cybersecurity
- Large Language Models

Projects

Subscription Graveyard (In Progress) | *Python, FastAPI, React, NLP, Firebase*

- Building an app that scans bank SMS and email records to identify forgotten active subscriptions and recurring expenses
- Implementing merchant extraction, recurring-payment detection, and spending analytics dashboards using NLP techniques

Neighborhood Lending Library (In Progress) | *React, Node.js, Firebase, Geolocation API*

- Building a hyperlocal P2P lending platform for tools, books, and gadgets with real-time item availability tracking
- Implementing a user trust and reputation system with geo-based discovery using Firebase and location APIs

ChapterChat – AI-powered Book Q&A Chatbot | *LangChain, OpenAI API, ChromaDB, Flask, PostgreSQL* | GitHub

- Designed and implemented a RAG-based chatbot for answering queries from PDF documents
- Implemented document parsing, text chunking, and vector embeddings using ChromaDB
- Developed backend APIs using Flask and PostgreSQL for structured data handling

Virtual Study Room | *React, Node.js, WebRTC, Firebase* | GitHub

- Built a real-time collaborative study platform supporting video, audio, and chat communication
- Implemented peer-to-peer communication using WebRTC and Firebase signaling
- Developed backend services using Node.js and REST architecture

Phishing Detection Chatbot | *Python, Scikit-learn, Flask, Docker, Jenkins* | GitHub

- Developed a machine learning-based chatbot for phishing detection with classification models
- Implemented explainable outputs such as confidence scores and rule-based reasoning
- Containerized application using Docker and simulated CI/CD pipelines with Jenkins

Technical Skills

Languages: Python, JavaScript, SQL

Frameworks & Tools: React, FastAPI, Flask, Node.js, Express

AI/ML: Scikit-learn, TensorFlow, PyTorch, Hugging Face, LangChain, OpenAI API

Databases: PostgreSQL, MongoDB, ChromaDB

Tools: Git, Docker, Jenkins, Firebase

Certifications

Lloyds Banking Group – Data Science Job Simulation

March 2026

- Built a customer churn prediction model using Random Forest (ROC-AUC: 0.82)
- Performed feature engineering, preprocessing, and hyperparameter tuning using scikit-learn
- Derived insights using feature importance analysis

Deloitte Australia – Cybersecurity Job Simulation

March 2026

- Analyzed web activity logs to identify suspicious behavior
- Investigated simulated cyber incidents and supported threat detection

Natural Language Processing Specialization – Coursera

2023
